

# Conexus Academy

**The more we do for our Conexus healthcare professionals, the more they can do to help people live longer, healthier lives.**

Conexus provides professional development opportunities and education for each Conexus healthcare professional based on their individual needs.

**Starting with a personal learning plan, we offer education and development opportunities for our healthcare professionals through Conexus Academy.**

#### Personalized

Each healthcare professional has different skills and different goals. While career advancement and growth are common reasons to work in the U.S., your personal learning assessment helps determine the right learning path for you.

#### Immersive

Based on your personal learning path, Conexus Academy offers different ways for you to learn. Whether you are provided a self-paced course such as Healthcare in the U.S. 101, or you conduct virtual simulation or assimilation classes, we provide the content and support you need for success as a U.S. healthcare professional.

#### Enduring

While some programs provide lots of training only at the beginning of a new role, we provide learning and growth opportunities throughout your assignment. Whether it is giving you free access to continuing education units (CEUs), or awarding an academic scholarship through our EARN program for you to continue learning and upskilling, we support you and your educational needs as a U.S. healthcare professional.

*"Give someone a fish, feed them for a day; teach someone to fish, feed them for a lifetime."*
